- Engineering Services
- Interior Design
- Acoustic Services

The hotel is a 128 bed, seven storey Hampton by Hilton hotel which is situated on a prominent site in Stockton on Tees, overlooking the riverside. The project represents the next phase of development in the Northshore masterplan and will be a significant boost to the local economy.

The Council's Cabinet Member for Regeneration and Housing, Councillor Nigel Cooke, said: "It's great to see construction of the hotel progressing really well and there's no more obvious sign of that than the arrival of this impressive machine on site. It won't be long before the steelwork starts taking shape too".

Construction works commenced in November 2017 and are due to be complete early 2019.

Aura were appointed by Stockton Borough Council via the NEPO Framework to deliver a multi-disciplinary team for the development of Northshore Hotel.
