

## Green Wall

Client - Teesside University

Sector - Education | Completed - September 2015 | Cost - £1.5M

### Services Delivered

- Project Management
- Quantity Surveying

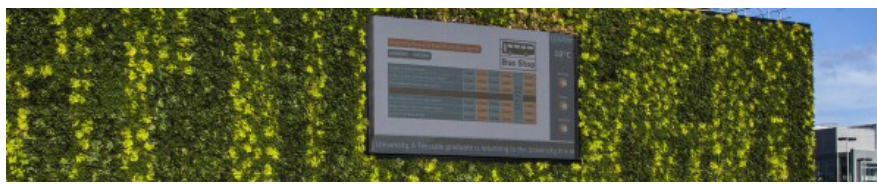

Aura were appointed through the NEPO Framework by Teesside University to provide project management and quantity surveying services on the student centre green wall project in the heart of Teesside.

The green wall, with one of the largest flat screens in the region, is a vibrant outdoor space for students to meet, perform and socialise.

The vertical garden of 205m2 was installed on the rear of the student centre, framing a giant 36sqm LED screen which is used to provide information and showcase events. This project includes approximately 15,000 plants including Hedera helix, Heuchera and Euonymus to create a lush green matrix planting plan.

“Aura has supported the University on a variety of capital projects over the last 5 years, their approach is flexible & adaptable and we have found the service they offer to be a good fit to our strategy and delivery requirements”.  
Darren Vipond, Director, Campus Services, Teesside University.

Works were successfully completed on time and handed over September 2015.

Malcolm Page, Chief Operating Officer at Teesside University, said: ‘The living wall and screen will provide a fantastic addition to the Campus Heart developments’.
