Sector - Education | Completed - September 2017 | Cost - £7M

Services Delivered

- Architectural
- Landscape Design
- Principal Designer
- BIM Co-ordinator
- Building Services Design
- Structural Engineering Design
- Acoustic Design

Aura were appointed through the NEPO Framework by Teesside University to provide multi-disciplinary design team services for phases 2, 3 and 4 of the refurbishment of the University's existing central library.

The library plays a pivotal role for every student and visitor to the campus, providing a central resource for all faculty areas, and also a popular ICT resource which is open for extended hours.

"Aura have now worked with the University on a number of projects, the Library refurbishment being the most current. Aura have continued to provide excellent support and assistance, delivering projects on time and within budget".
Darren Vipond, Director, Campus Services, Teesside University.

Level 1 (Phase 2) works were completed over the 2016 summer break. Works were successfully completed on time and within budget, giving the client confidence that the next two phases of the project could be brought forward and delivered as a single phase.

Levels 2 & 3 (Phases 3 & 4) were successfully completed in planned stages up to September 2017.

The project has created a greater range of accessible study spaces and has allowed the Library to move to a 24/7 model of operation.
