### Services Delivered

- Quantity Surveying

Aura were appointed through the NEPO Framework by Teesside University to provide quantity surveying services on the National Horizons Centre.

The National Horizons Centre is a UK centre of excellence for the bioscience sector, focussing on developing the technical, innovation & management skills and knowledge needed for the sector to continue to grow and generate jobs and wealth in Tees Valley.

It has been established to support the bioscience sector, which includes biologics, biomedical sciences, industrial biotechnology and digital. It plays a key part in driving STEM skills and economic growth in the Tees Valley, through industry-focused education and training and collaborative research and innovation.

Its imaginative design includes an exciting blend of teaching, learning and collaboration spaces, together with hi-tech laboratories and a state-of-the-art computing suite.

Professor Croney, Teesside University, said: "The National Horizons Centre is the result of significant work with industry and our partners, to identify how best the bioscience sector can reach its full potential through provision of the right education, training and collaborative innovation."

The Centre was completed was completed in spring 2019.
