

Orion

Client - Teesside University

Sector - Education | Completed - November 2015 | Cost £26K

Services Delivered

- Quantity Surveying
- CDMC Services

Aura were appointed through the NEPO Framework by Teesside University to provide quantity surveying and CDMC services for the Orion Building laboratories and workshops. The School of Science and Engineering (SSE) identified the need to construct a new full height extension onto the east elevation of the Orion Building.

The works associated with this project consisted of the quantity surveying and CDMC services of a three storey extension, enabling Teesside University to substantially upgrade their learning environment with access to the latest industry standard equipment for a highly industrially relevant and representation learning experience.

“Aura has supported the University on a variety of capital projects over the last 5 years, their approach is flexible & adaptable and we have found the service they offer to be a good fit to our strategy and delivery requirements”.
Darren Vipond, Director, Campus Services, Teesside

Professor Simon Hodgson, Dean of the University's School of Science & Engineering, added “This development will benefit our students across our whole range of professionally accredited courses and help us to maintain our position as a university committed to producing graduates with outstanding skills in technical problem solving and innovation, destined to become the next generation of leaders of our science and engineering industries”.
