

Are you ready for PFI Handback?

What is the challenge?

The first wave of PFI contracts are rapidly approaching the end of their contractual term. It is vital that clients, SPVs and contractors engage now to consider the requirements and process to achieve a smooth, efficient transition.

How can Aura help?

Aura's PFI Handback and Post Contract Facilities Management Service will manage the risks as contracts come to an end. We have procurement routes and we're independent of funders and FM service providers.

Aura's Project Managers will use their extensive experience of PFI portfolios across the UK to develop a detailed process that addresses the actions necessary to achieve successful handback and continued operation of assets. Our bespoke handback programme aligns to your assets, and will ensure that your buildings, plant and equipment are maintained and repaired once the PFI contract is finished.

What will it achieve?

- Contract review and action plan
- PPM reactive Audit
- Scoping of handback requirements
- Asset surveys and data collection
- Soft Landings action plan for Post Contract Facilities Management
- Post contract facilities management services

All overseen and coordinated by an experienced Aura Project Manager with specialist services delivered by experts from within Aura's extensive, national supply chain.
