

GlaxoSmithKline (GSK)

Bid Management Services for Merit Design, Construction and Fit Out Works

Services Delivered

- Bid Management

Aura was appointed by Merit to provide bid management services for GlaxoSmithKline (GSK) HVAC update and Places Portfolio works.

The Aura team boast a wealth of experience and success in the complexities of the tender process in the engineering and construction sectors. Working closely with Merit, the Aura team offer an end to end service, developing a detailed understanding of their client's needs and draw from the vast technical knowledge of high complex environments, such as cleanrooms and laboratories to incorporate within the bid response.

Merit has been working with GSK from 2013 and developed such a strong partnership. Such was the success of this partnership, Merit was asked to tender for the delivery of the HVAC upgrade as well as three other projects associated with the Places Portfolio. The programme of works were split into four distinct areas of works to the three storey building;

- Chemistry Manufacturing Control (CMC) HVAC
- Chemistry Manufacturing Control (CMC) Labs
- Rapid Development Area (RDA)
- Oral Solid Dosage (OSD)

In 2016, Merit were awarded the Places Portfolio for the suite of 4 individual projects to provide GSK with a write up, collaboration, laboratory and GMP cleanroom space.

Aura were thrilled to support Merit with bid management services for the GSK and collaborate with a British multinational pharmaceutical company to support the next generation of vaccines, consumer healthcare and pharmaceuticals.

Through careful planning, works were successfully delivered in a complex live site with uninterrupted workflow. Merit further added value to these works by prefabricating racks off site to save time and costs for this project.
